

# Mohammad Elfauri

Frontend Developer Specialist | UI/UX Designer

[moework190@gmail.com](mailto:moework190@gmail.com) | +962 792 792 606 | Amman, Jordan | [github.com/Moefaouri](https://github.com/Moefaouri) | [linkedin.com/in/el-fauri](https://linkedin.com/in/el-fauri)

## PROFESSIONAL SUMMARY

Frontend Developer Specialist with 3+ years of experience building production-ready web and mobile applications for Jordan's national healthcare platform. I've been part of a team shipping 8+ internal systems used daily by medical professionals across the country. I care deeply about code quality, design consistency, and delivering interfaces that just work — the first time.

## PROFESSIONAL EXPERIENCE

### Frontend Developer — **Hakeem — National Health Information Center**

Amman, Jordan · Oct 2023 – Present

- Contributed to building 8+ healthcare web modules as part of a cross-functional team — including Hakeem Dashboard, PIM Web, Surgery Management, Scheduling, Emergency System, Medical Committee, and Health Pre-Marital Certificate.
- Led the frontend of Dr. Hakeem (React Native) and My Hakeem (WebView) mobile apps, covering all patient and physician-facing screens.
- Reduced UI inconsistency issues across products by building a shared component library, cutting repeated design fixes by ~40%.
- Owned UI/UX design end-to-end using Adobe XD, Photoshop, and Illustrator — from first wireframe to final handoff — across every product I was involved in.
- Integrated 10+ REST API endpoints per module, working directly with backend engineers to align data structures with UI requirements.

### Quality Assurance Intern — **Royal Scientific Society**

Amman, Jordan · Undergraduate Internship (90 hours)

- Executed 50+ structured manual test cases for web applications, logging and tracking defects through full resolution cycles.

## PROJECTS

### **Hakeem Healthcare Suite** · *JavaScript · CSS · PHP · React Native · Adobe XD*

Part of the team that built and maintains Jordan's national health platform frontend. Involved across 8+ modules covering clinical workflows, patient management, and mobile access.

Contributed to both web (JavaScript, CSS, PHP) and mobile (React Native, WebView) surfaces, with full UI/UX ownership on the modules I led.

### **UI Consistency Checker** · *React.js · CSS*

Built to solve a real team problem: catching UI inconsistencies — wrong fonts, mismatched colors, broken spacing — before they reach production. Previously these slipped through review, causing rework cycles that wasted dev time and maintenance cost. The tool lets anyone on the team upload a screenshot and get instant, specific feedback, keeping quality high without slowing down delivery.

### **Beedouin** · *React.js · Next.js · CSS*

[beedouin.com](http://beedouin.com) | [github.com/Moefaouri](https://github.com/Moefaouri)

Full e-commerce storefront for a Jordanian honey brand — live in production, serving real orders across Jordan. Built in Arabic with full RTL layout, product catalog, cart, and contact flow.

**Personal Portfolio** · *React.js · Next.js · CSS*

[moelfaouriportfolio.vercel.app](https://moelfaouriportfolio.vercel.app)

Showcases selected projects, services, and resume. Deployed on Vercel.

## TECHNICAL SKILLS

---

**Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Material Design, ApexCharts

**Mobile:** React Native, WebView

**Design:** Adobe XD, Photoshop, Illustrator, Wireframing, Prototyping, Usability Testing

**Workflow:** Git, GitHub, REST API Integration, Agile / Scrum

**Other:** Business Analysis (Power BI), Requirements Gathering, Cross-team Collaboration

## EDUCATION

---

### Bachelor of Science — Business Information Technology (BIT)

University of Jordan, Amman · 2019 – 2023

## LANGUAGES

---

**Arabic** (Native) · **English** (Professional — Advanced)
